

Rainy spell expected to continue

THE SUN 26/10/2006

KUALA LUMPUR: Scattered rain and thunderstorms in the west coast of peninsular Malaysia will continue over the next few days, the Meteorological Services Department said.

It said in a statement yesterday there could be a risk of flooding in

low-lying areas if rain persisted over the next few days.

The department said most parts of Sarawak were expected to experience heavier rainfall and thunderstorms over the next few days.

The condition would improve this weekend, it added. — Bernama
